

regulation by federal, state, or local organizations having management responsibility and authority over the natural resources in question, including hunting or fishing during hunting or fishing seasons established by state authorities pursuant to their state fish and game management laws. With regard to natural resources regulated by another federal agency, the responsible command may cooperate in any environmental analysis that may be required by the other agency's regulations.

(31) Approval of recreational activities which do not involve significant physical alteration of the environment or increase human disturbance in sensitive natural habitats and which do not occur in or adjacent to areas inhabited by endangered or threatened species.

(32) Routine maintenance of timber stands, including issuance of down-wood firewood permits, hazardous tree removal, and sanitation salvage.

(33) Reintroduction of endemic or native species (other than endangered or threatened species) into their historic habitat when no substantial site preparation is involved.

[55 FR 33899, Aug. 20, 1990, as amended at 55 FR 39960, Oct. 1, 1990]

§ 775.7 Time limits for environmental documents.

(a) The timing of the preparation, circulation, submission and public availability of environmental documents is important in achieving the purposes of NEPA. Therefore, the NEPA process shall begin as early as possible in the decisionmaking process.

(b) The EPA publishes a weekly notice in the FEDERAL REGISTER of environmental impact statements filed during the preceding week. The minimum time periods set forth below shall be calculated from the date of publication of notices in the FEDERAL REGISTER. No decision on the proposed action may take place until the later of the following dates:

(1) Ninety days after publication of the notice of availability for a draft environmental impact statement (DEIS). Draft statements shall be available to the public for 15 days prior to any pub-

lic hearing on the DEIS (40 CFR 1506.6(c)(2)).

(2) Thirty days after publication of the notice of availability for a final environmental impact statement (FEIS). If the FEIS is available to the public within ninety days from the availability of the DEIS, the minimum thirty day period and the minimum ninety day period may run concurrently. However, not less than 45 days from publication of notice of filing shall be allowed for public comment on draft statements prior to filing of the FEIS (40 CFR 1506.10(c)).

§ 775.8 Scoping.

As soon as practicable after the decision to prepare an EIS is made, an early and open process called "scoping" shall be used to determine the scope of issues to be addressed and to identify the significant issues to be analyzed in depth related to the proposed action (40 CFR 1501.7). This process also serves to deemphasize insignificant issues, narrowing the scope of the EIS process accordingly (40 CFR 1500.4(g)). Scoping results in the identification by the proponent of the range of actions, alternatives, and impacts to be considered in the EIS (40 CFR 1508.25). For any action, this scope may depend on the relationship of the proposed action to other existing environmental documentation.

§ 775.9 Documentation and analysis.

(a) Environmental documentation and analyses required by this rule should be integrated as much as practicable with any environmental studies, surveys and impact analyses required by other environmental review laws and executive orders (40 CFR 1502.25). When a cost-benefit analysis has been prepared in conjunction with an action which also requires a NEPA analysis, the cost-benefit analysis shall be integrated into the environmental documentation.

(b) CEQ regulations encourage the use of tiering whenever appropriate to eliminate repetitive discussions of the same issues and to focus on the actual issues ripe for discussion at each level of environmental review (40 CFR 1502.20). Tiering is accomplished
